

Wired Headset DH-036T

Extremely durable headset for demanding use in office and contact center. Improved wideband frequency response for more natural sounding audio.

Efficiency

DH-036T headset is equipped with a flexible microphone boom arm for an optimal positioning from the mouth and the large ear cushion surrounding noise outstanding. The wideband receiver is suitable specially for IP telephony and unified communications.

Performance

The noise cancelling microphone reduces the background noise to be used at noise environment conditions such as contact center and Acoustic shock protection receiver protects an ear from the Acoustic fluctuation.

Compatibility

Available with the standard Dasan QD's and optionally PLX and GN QD's.

The standard connector is RJ9/11 modular jack and optionally, 2.5/3.5mm plugs and USB connector. Compatible with all kinds of Desk phones, DECT, IP phones, Softphones and Skype, MS Lync.

Feature at a glance

- Durable Headband style.
- Acoustic shock protection receiver
- High-end receiver for "pure" hearing
- Microphone static shock protection
- Noise cancelling microphone for back ground noise reduction
